Test Location (C,S) GROVE CITY, OH. Number of Compartments 4

Trlr. Vin. # (If Applicable) 1HLA3A7B9R7H57546

Compartment Size: 1-3100 2-1600 3-1600 4-3100

Year Tank Mfg. 1993 Mfg. Name HEIL TRAILER Gallons 9400

Minimum Thickness Of Cargo Tank Shell NA Heads NA

Is Tank Lined? NO Insulated? NO

Is the unit used for transport of any material other than petroleum based products? NO

External Visual Inspection 180.407 (d)

		Faulty	Okay
1.)	External Inspection Of Tank Shell And Heads:		
	A) Corroded or Abraded Areas (Rust)		X
	B) Dents of Punctures		X
	C) Distortion of Defects In Welds		X
	D) Thickness Testing Needed		X
	E) Tank Has Imaging Decals (Wrap)		NO
	Internal Visual In Accordance To 180,407 (c)		NO
2.)	External Inspection Of Piping, Valves, Gaskets:		
	A) Corroded Areas		X
	B) Defects in Welds, Signs of Leakage		X
	C) Condition of delivery, vapor hoses		X

(VKE) REVISION 11/21 (pg2) Work Order # 104326

	Faulty	Okay
3) External Inspection Of Manholes: A) Devices for tightening manhole covers operative		X
B) Evidence of leakage		X
C) Inspect and pressure test fill lids, normal vents	X	
4) External Inspection Of Emergency Valves And Devices A) Emergency valves free from corrosion, erosion, distortion,		
or external damage that would prevent safe operation		X
B) Remote trip control in operation / activate	X	Х
C) Leakage test seating disc in emergency valve D) Self closing stop valves in operation - function		X
D) Sett closing stop varves in operation - function		
5) Missing bolts, nuts, and fusible links must be replaced and		37
loose nuts - bolts tightened		X
6) All Required Marking On Tank Legible		
A) DOT spec. plate accessible / legible		X
B) Flammable placards legible (all 4-sides)		X
7) External Inspection Of All Major Appurtenances		
A) Fifth wheel plate, pins, bolts		X
B) Suspension, springs, hangers, etc.		X
C) Frame, cross members, gussets, etc.		X
8) Inspect all re-closing pressure relief valves		X
9) Lights, reflectors, wiring in good working order		X
10) Brakes in good working order		X
11) Air hoses above axles, chambers, chafed, or rotted		Χ
12) Air system have any leaks		X
13) Tank mounting bolts, boards, attachments in proper working order		X
order		<i>7</i> .
14) Leakage test entire pump system(s)		NA

10/13/25

Leakage Test 180.407 (h) Pneumatic

Each eargo tank with all valves and accessories in place or operative must be tested at not less than 80% of the tank design pressure or maximum allowable working pressure (MAWP) whichever is marked on the certification plate.

Certified Inspection Requirements - All Boxes Must Be Completed								NO	
1. Is the overflow protection system in working condition and have the overfill protection probes been set and tested to a minimum 60 gross gallons?							V		
2. Has each compartment probe been tes	ted to verify it activates t	the snutdown c	ircuitry on	this unit?			V		
3. Has the grounding sytem been checked manner?	to ensure it is in working	g condition and	i has not be	en modifie	d or rewired	in any	V		
4. Has the grounding system been tamper	ed with to allow a false :	reading to pern	nit loading?					1	
5. Are all gauge rods and compartment pr	otusions grounded with	secure bonding	wires?				1		
6. Has a brake interlock system been insta	illed on the loading head	er and vapor re	ecovery hos	e?			V		
probes. This certifies that the entire operation of the truck overfill prevention system is wired correctly and that the entire system is working correctly. The trailer noted meets the requirements for the overfill probes to be set where the maximun safe fill is at least sixty (60) gallons less than the manufacturers specified compartment capacity. The carrier certifies that all DOT inspections, stickers, decals and DOT 396/17 data is current for this trailer. An emergency response guidebook is on board and the vehicle has compartment capacity / strapping charts that are current and available upon request. Max Compartment Capacities							ns less Y

Buckeye Annual & Post Incident Trailer Inspection Form

This form must be completed each year or following a lock out on each trailer and provided to each facility utilized by this equipment. This form shall accompany the federally required annual pressure-vacuum test or Distillate Only Loading Certification and as such any equipment without either shall be automatically be locked out from the loading system if no renewal is provided on or before the anniversary date.
