Buckeye Annual & Post Incident Trailer Inspection Form

This form must be completed each year or following a lock out on each trailer and provided to each facility utilized by this equipment. This form shall accompany the faderally required annual pressure-vacuum test or Distillate Only Loading Certification and as such any equipment without either shall be automatically be locked out from the loading system if no renewal is provided on or before the anniversary date.

Certifled Inspection Company Verification Requirements

Wet Test Certification

The Overfit Protection Probe system has been inspected and is in operating condition. The process should test the probe of each compartment with a liquid to verify it activates the shuldown circuity.

Ullage Certification

Overfil Protection Probes are at such a height to show for 60 gallons of ullage prior to reaching the compartments maximum volume.

Grounding System Certification

The Grounding system has been checked and is in proper working condition, AND has not been modified in any way to provide a false reading atowing the trailer to be loaded.

Brake Interlock Certification

A brake interlock system is installed and functional or the loading header and the venor recovery hose connection.

MC 385 / DCT 406 Certification

The unit has passed the inspection and is released for return to service.
